# FRENCH TECHNOLOGICAL INNOVATION TO DENSIFY YOUR HAIR

Miltahead has a unique technology that acts in depth.

The synergy of the emission - visible spectrum, infrared, soft laser and magnetic field - and the exceptional diffusion ( up to 13 cm under the skin) tone up the hair bulb to lengthen the anagen phase by stimulating the stem cells , which enables the growth of new hair.

- Diminishes hair loss
- Hair follicles are stimulated
- Stem cells are mobilized
- Improves hair growth
- Strengthens the scalp

## PROVEN EFFICIENCY

- Improves tissue trophicity
- Accelerated healing after implants
- Activates blood circulation
- Activates the synthesis of RNA and DNA
- Diminishes and prevent from hair loss
- Improves hair growth
- Increases the cellular energetic potential ( ATP)
- Regulates the hormone production

## LONG ACTING RESULTS

• Day of implants

• 2 days after

• 3 weeks after
